

# Index

## A

- ABCD* matrix, 24
  - relationship with  $M_{P'P}$  matrix, 25
- Aberrations, third order, 91
  - third order, classes, 91
- Absolute value, complex number, 143
- Afocal system, 25
- Air, index of refraction, 8
- Alhazen, 3
- Angle between two vectors, 66
- Angle of complex numbers, 143
- Angle of inclination  $\delta$ , 12
- Angstrom, 7
- Angular frequency  $\omega$ , 154
- Angular wave number  $k$ , 154
- Aperture, 184
- Argand diagram, 143
- Associative law, 9
- Astigmatism, 104-109
  - $D_{AT}$  tends to zero, 109
  - circle image, 108
  - sagittal line image, 107
  - summary diagram, 108
  - tangential line image, 107
  - third order, 104
- Average intensity, 156

## B

- Backward ray tracing, 17
- Barrel distortion, 112
- Bessel function, first-order, 193
- Biconvex lens, 11
- Binomial power series, 91
- Bisection method, Fraunhofer diffraction, 191
- Bright circular fringes, Michelson interferometer, 168

## C

- Calculations, precision, 17
- Cardinal points, 38, 40-42, 49-52
- Cardinal points/planes, 32
- Cases, four optical systems, 24
- Cayley, 8
- Center of curvature, 11
- Check equation, translation, 70
- Circle image, 108
- Circular fringes, Michelson interferometer, 170
  - doublet, 166
- Coherent waves, 165
- Column matrix, 9
  - vector, 9, 13
- Coma, third order, 101
- Commutative law, 9

- Complex algebra, 143
  - conjugate, 147
  - product, 149
- Complex Fresnel integral, 203
  - graphical construction, 204-205
- Complex numbers, 143
  - absolute value, 143
  - addition and subtraction, 146
  - addition, 145
  - angle, 143
  - complex conjugate, product, 149
  - conjugate of a conjugate, 148
  - conjugate, 147
  - de Moivre's theorem, 148
  - division, 147
  - important values, 145
  - magnitude, 143
  - multiplication, 146
  - negative, 145
  - polar form, 143-144
  - power series, 144
  - real part of a product, 149
  - real part of a sum, 149
  - rectangular form, 143
  - several examples, 148
  - subtraction, 146
  - the basic idea, 150
  - use in optics, 150
- Complex plane, 143
- Compound microscope, 124-126
- Concave lens, 11
- Conjugate points, 27
- Conjugate, 147
- Converging lens, 11
- Convex lens, 11
- Coordinate,  $y$ , 12
- Cornu spiral, 206
  - graphical meaning, 206-207
- Cosine function, polar form, squaring, 150
- Cosine power series, 91
- Cross product, 67, 71
- Curvature  $c$ , 12-13, 70
- Curvature, center of, 11
- Curvature of field, third order, 109
- Cylindrical surface, 11

## D

- Data, ray, 13
- de Moivre's theorem, 148
- Default, polar form angle, 143
- Deg, 8
- Descartes, René, 4

Determinant, refraction matrix, 13  
 Determinants and numbers, 10  
 Determinants, 8, 10  
 Diagrams, stereo, 64  
 Diffraction, integral for  $\mathbf{E}(P)$ , 185  
 Dimension arrows, 13, 24  
 Dimension lines, as vectors, 13  
 Direction  
   angles, 63  
   cosines, 63  
   identity, 64  
 Distant objects, magnifying power, 126-132  
 Distortion,  
   flow chart, 111  
   rotation of axes, 110  
   third order, 110  
 Diverging lens, 11  
 Dot product, 66  
   closer look, 70  
 Doublet,  
   circular fringes, Michelson interferometer, 170  
   intensity, Michelson interferometer, 170  
   spherical aberration, 82

**E**

Effective focal length,  $e\text{fl}$ , 38  
 $e\text{fl}$ , 38  
 Electric field, 183  
 Electromagnetic  
   field, light, 151  
   spectrum, 1  
 Ellipse, third-order astigmatism, 106  
 Equiconcave lens, 40  
 Equiconvex lens, 11, 38  
 Erect  
   image, 27  
   object, 27  
 Ether, 1  
 Euler's formula, 144  
 Exact ray tracing, 63, 68  
   generalized optical system, 73  
   illustrated example, 73  
   refraction equations, 71  
   translation equations, 68  
 Eye, normal, 119  
 Eyepiece, Ramsden, 41

**F**

$f, f'$ , 38  
 First-order Bessel function, 193  
 Flow chart,  
   distortion, 111  
   exact ray tracing, 73  
   TSA versus  $S$ , 79  
   zoom lens, 54

Focal lengths,  $f, f'$ , 38, 40-42, 49-52  
 Focal plane,  
   primed, 26  
   unprimed, 25-26  
 Focal points/planes, 32  
 Four optical system cases, 24  
 Fraunhofer  
   approximation, 185  
   condition, 186  
 Fraunhofer diffraction, 183  
   any aperture, 187  
   bisection method, 191  
   circular aperture, 189-192  
   graphical method, 190  
   intensity, rectangular aperture, 187-192  
   maxima and minima, 189-192  
   rectangular aperture, 187  
   single aperture, 185  
 Frequency  $\nu$ , 153  
   visible light, 155  
 Fresnel diffraction,  
   approximation, 201  
   Fresnel integrals, 202  
   historical background, 211  
   intensity  $I_0$ , 207  
   rectangular aperture, 202, 211-212  
   rectangular aperture, graph, 212  
   rectangular aperture, intensity, 203  
   single aperture, 201  
   single edge, 208-209  
   slit, 210-211  
 Fresnel integrals,  
    $C$  and  $S$ , 202  
   graphs, 204  
   odd functions, 204  
   table, 204  
 Fresnel, historical background, 203  
 Functions of  
    $z - vt$ , 151  
    $z + vt$ , 152

**G**

Galilean telescope, 130-131  
 Gaussian constants,  
    $a, b, c, d$ , 22-23, 29, 38, 40-42, 45, 49-50, 52  
   thin lens, 49  
 Gaussian  
   equations, 43  
   formulation, 43  
 General lens system, nearby objects, 120-121  
 Geometrical path, 158  
 Graphical method, Fraunhofer diffraction, 190  
 Graphs  
   doublet, Michelson interferometer, 170-171  
   monochromatic source, Michelson interferometer, 169

**H**

- Halback, 8
- Harmonic waves, 143
  - angular frequency  $\omega$ , 154
  - angular wave number  $k$ , 154
  - as phasors, 154
  - description by cosine function, 151
  - frequency  $\nu$ , 153
  - instantaneous intensity, 156
  - intensity, 155-156
  - optical path difference, 157-158
  - other media, 157
  - period  $T$ , 153
  - phase  $\theta$ , 152
  - phase constant  $\phi$ , 152
  - phase difference, 157-158
  - plane waves, 155
  - representation in complex plane, 154
  - spatial period  $\lambda$ , 154
  - speed of wave travel, 155
  - summary, 155
  - time average intensity, 156
  - travel to left, 152
  - travel to right, 151
  - traveling, 151
  - visible light, frequency, 155
  - wave number  $\sigma$ , 153
  - wavefront, 155
  - wavelength  $\lambda$ , 154
- Height,
  - converging lens, 80-81
  - image, 28
  - object, 28
- Hero of Alexandria, 3
- Homogeneous, 7
- Huygens' eyepiece, 50
- Huygens' principle, 183

**I**

- $i$  properties, 143
- Identity matrix, 9
- Identity, direction cosines, 64
- Im axis, 143
- Image
  - continuous, 27
  - erect or inverted, 27
  - height, 28
  - location, three-ray method, 39, 49
  - plane, 27
  - plane  $x'$ ,  $y'$  power series, 97
  - space, 28
  - virtual, 28, 41
- Imaginary number, 143
- Incident ray, 7
- Index of refraction conflict, thin lens, 48

Index of refraction, 7

- air, 8
- water, 8

Instantaneous intensity, 156

Intensity, doublet, Michelson interferometer, 170

Intensity, 155-156

- instantaneous, 156
- Michelson interferometer, 166, 168
- spectral, 172
- time average, 156

Interference of waves, 165

Inverse matrices, 17

Inverse, matrix, 10

Inverted

- image, 27
- object, 27

Isotropic, 7

Iterative, 12

**J**

Janssen, Zacharias, 3

**K**

Kepler, 4

**L**

$\ell$ ,  $\ell'$

- relation, 27
- distances, 24

Law of rectilinear propagation, 7

Law of reflection, 3-4, 7

- discovery, 4

Lens surfaces as planes, 21

Lens systems, 11

- nearby objects, 120-121
- scale linearly, 22

Lens,

- biconcave, 11
- biconvex, 11
- concave, 11
- converging, 11
- convex, 11
- diverging, 11
- equiconcave, 11, 18
- equiconvex, 11, 15
- lentils, 11
- manufacture, 11
- meniscus-concave, 11
- meniscus-convex, 11
- negative, 11
- planar-concave, 11
- planar-convex, 11
- planoconcave, 11
- positive, 11
- simple, 11

- Visibility, 172
  - definition, 174
  - derivation, 174-175
  - Gaussian, 175
  - Lorentzian, 176
  - Michelson interferometer, 171
  - sodium-like, 177
- Visible light, 1
- Visual instruments, 119
- W**
- Water, index of refraction, 8
- Wave number  $\sigma$ , 153
- Wave trains,
  - length, 171
  - many wavelengths, 171
- Wavelength,
  - $\lambda$ , 7, 154
  - other media, 157
- Wavelets, 183
- Y**
- y axis, 11
- Z**
- z axis, 11
- Zoom lens, 51
  - flow chart, 54
